

## Water Quality Testing Data Collection Sheet

**Prediction:** (Which one of the samples looks like it is only water, with nothing else in it – why?)

We think sample jar \_\_\_\_\_ contains only tap water.

Sample	Use 3 words to describe what it looks like. (Appearance)	Use 3 words to describe what it smells like. (Odor)	What is the pH of the sample?	Is it an Acid, Base, or Neutral?	Is this sample "water only"? (Yes or No)
A					
B					
C					
D					
E					

**Conclusion:**

Our testing shows that sample jar \_\_\_\_\_ contains only tap water.

After testing the samples, was your prediction correct? Does the evidence you gathered support what you originally thought? If so, why? If not, why?
